Apple Education Pricing is available to current and newly accepted university students and their parents, as well as teachers and staff at all levels. Quantity limits apply.

Qualified Purchasers receive an Apple Gift Card when they purchase an eligible Mac or iPad at a Qualifying Location. Only one Promotion Product per eligible Mac or eligible iPad per Qualified Purchaser. Offer subject to availability. While supplies last. View full terms and conditions of offer [here](/uk-edu/shop/open/back_to_school/terms_conditions).

\* Quantity limits apply. Visit the Apple Store for Education for full details.

1. Requires initial sign-up and enrolment verification by UNiDAYS.

2. Limited-time offer; offer may end at any time. Free Apple TV+ access for students ends when you no longer qualify or do not renew your Apple Music Student subscription. Offer is valid for verified students only and does not extend to a Family Sharing group.

3. The promotional Apple Education Pricing on AppleCare+ is available for eligible products purchased during the promotional period only. Apple offers Education Pricing on AppleCare+ at different rates from this promotional rate throughout the year on certain products if purchased within 60 days of your Apple Product; eligible products may vary outside of the promotional period. The promotional Apple Education Pricing on AppleCare+ cannot be combined with non-promotional Apple Education Pricing. For complete details regarding AppleCare+ coverage, see [terms and conditions](https://www.apple.com/uk/legal/sales-support/applecare/applecareplus).

This promotional AppleCare+ Education Pricing is applicable only to two-year paid upfront AppleCare+ for iPad and three-year paid upfront AppleCare+ for Mac and is not applicable to any recurring payment AppleCare+ plans.

I am a founder of a Non profit organization that focuses on reinforcing the education and resources available to the Deaf and hard of hearing students in Hillsborough County Florida. I have currently running an after school program at one of the elementary schools in our county. Hillsborough county has 650+ deaf and hard of hearing students. I would like to be able to set up a program at the other school sights as well as a community center in order to help the families of the Deaf and hard of hearing students. Does Apple provide community support for such programs? Some visual components of WP Google Maps use 3rd party libraries which are loaded over the network. At present the libraries are Google Maps, Open Street Map, jQuery DataTables and FontAwesome. When loading resources over a network, the 3rd party server will receive your IP address and User Agent string amongst other details. Please refer to the Privacy Policy of the respective libraries for details on how they use data and the process to exercise your rights under the GDPR regulations.

WP Google Maps uses jQuery DataTables to display sortable, searchable tables, such as that seen in the Advanced Marker Listing and on the Map Edit Page. jQuery DataTables in certain circumstances uses a cookie to save and later recall the "state" of a given table - that is, the search term, sort column and order and current page. This data is held in local storage and retained until this is cleared manually. No libraries used by WP Google Maps transmit this information.

Please see [here](https://developers.google.com/maps/terms) and [here](https://maps.google.com/help/terms_maps.html) for Google's terms. Please also see [here](https://policies.google.com/privacy?hl=en-GB&gl=uk) for Google's Privacy Policy. We do not send the API provider any personally identifying information, or information that could uniquely identify your device.

Where this notice is displayed in place of a map, agreeing to this notice will store a cookie recording your agreement so you are not prompted again.

Their first product, known as the Apple I, consisted of an assembled circuit board without many of a computer's present-day features, such as a display, keyboard, or mouse. Today, Apple's ecosystem includes iPhone, iPad, Mac, wearable and home device as well as a range of accessories and other services. Technical innovation paired with minimalistic designs and creative advertisements under former CEO Steve Jobs's leadership made Apple one of the world's most valuable brands. The company benefits from a loyal fan base and has experienced unparalleled revenue growth, from just eight billion U.S. dollars in 2004 to more than 270 billion in 2020.

## Mac and iPad

Apple's breakthrough came when the company launched the Macintosh in 1984, a product that became the first successful mass-market personal computer (PC) and continues as the Mac product line today. Apple introduced the Apple Online Store, followed by the iMac family of PCs in 1998. In January 2010, the iPad unveiling marked yet another milestone in the industry. The device sold more than three million units in the first three months, setting a new industry benchmark. Mac's current product line is iMac, Mac mini, Mac Pro, MacBook Air and MacBook Pro while the iPad range includes iPad, iPad Air, iPad mini, iPad Pro. The iPad has shares of around 30 percent in the tablet market.

## iPod and iPhone

In 2001 Apple unveiled iPod which was a tremendous success with several hundred million units sold. Due to the popularity of smartphones doubling as a personal music player, iPod declined in popularity. In 2007, the iPhone's release and the introduction of an interface with a design concept of creating a full-fledged computer in hand that could make calls and browse the internet marked a revolution in the global smartphone market. The iPhone is Apple's most successful product, contributing a major proportion of the company's total revenue. In its 14th generation, the iPhone 12/12 mini line and the iPhone 12 Pro/12 Pro Max are the family's newest additions.

## Wearables, Home and Services

With the launch of the Apple Watch in early 2015, Apple entered the growing wearables market. The Apple Watch is now the most popular product in the wearables segment, with over 50 percent of the market share. In addition to this, the launch of AirPods in December 2016 marked Apple's entry into the market of true wireless stereo, steadily capturing a majority of the hearables market share. Apple's line of products are supported by a range of services including Apple Music, Apple TV+, Apple Arcade, iCloud, as well as other services helping to keep people entertained, informed, connected, and fit. Apple's services generate billions of U.S. dollars in revenue per quarter. The company has also entered the smart speakers market with the HomePods and is also working on augmented reality (AR) smart glasses running on rumored "rOS" with a first step in the AR market expected in 2022.

<h2>Mac
and iPad</h2>
```

Apple's breakthrough came when the company launched the Macintosh in 1984, a product that became the first successful mass-market personal computer (PC) and continues as the Mac product line today. Apple introduced the Apple Online Store, followed by the iMac family of PCs in 1998. In January 2010, the iPad unveiling marked yet another milestone in the industry. The device sold <a href="/statistics/269915/global-apple-ipad-sales-since-q3-2010/" target="\_blank" rel="noopener">more than three million units in the first three months</a>, setting a new industry benchmark. Macs' current product line is iMac, Mac mini, Mac Pro, MacBook Air and MacBook Pro while the iPad range includes iPad, iPad Air, iPad mini, iPad Pro. The <a href="/topics/877/ipad/" target="\_blank" rel="noopener">iPad</a> has shares of around <a href="/statistics/500235/tablet-market-share-by-vendor-worldwide/" target="\_blank" rel="noopener">30 percent in the tablet market</a>.

```

<h2>iPod and iPhone </h2>
```

In 2001 Apple unveiled iPod which was a tremendous success with <a href="/statistics/276307/global-apple-ipod-sales-since-fiscal-year-2006/" target="\_blank" rel="noopener">several hundred million units sold</a>. Due to the popularity of <a href="/topics/840/smartphones/" target="\_blank" rel="noopener">smartphones</a> doubling as a personal music player, iPod declined in popularity. In 2007, the iPhone's release and the introduction of an interface with a design concept of creating a full-fledged computer in hand that could make calls and browse the internet marked a revolution in the global smartphone market. The iPhone is Apple's most successful product, contributing a major proportion of the company's <a href="/statistics/382260/segments-share-revenue-of-apple/" target="\_blank" rel="noopener">total revenue</a>. In its 14th generation, the iPhone 12/12 mini line and the iPhone 12 Pro/12 Pro Max are the family's newest additions.

```

<h2>Wearables, Home and Services </h2>
```

With the launch of the Apple Watch in early 2015, Apple entered the growing wearables market. The Apple Watch is now the most popular product in the wearables segment, with <a href="/statistics/524830/global-smartwatch-vendors-market-share/" target="\_blank" rel="noopener">over 50 percent of the market share</a>. In addition to this, the launch of AirPods in December 2016 marked Apple's entry into the market of true wireless stereo, steadily capturing a majority of the <a href="/topics/6209/hearables/" target="\_blank" rel="noopener">hearables</a> market share. Apple's line of products are supported by a range of services including Apple Music, Apple TV+, Apple Arcade, iCloud, as well as other services helping to keep people entertained, informed, connected, and fit. Apple's services generate billions of U.S. dollars in

[revenue per quarter](/statistics/250918/apples-revenue-from-itunes-software-and-services/). The company has also entered the smart speakers market with the HomePods and is also working on augmented reality (AR) smart glasses running on rumored "rOS" with a first step in the AR market expected in 2022.
